

Rewetting Concentrate 2600

Characteristics:

Rewetting Concentrate 2600 is used where humidity is withdrawn from the paper web. Rewetting devices of WEKO, Eltex, Dox, M.E.G. etc. give back humidity to the paper web. In order to achieve an optimal penetration of water on printed and unprinted spots it is necessary to mix the water with a **Rewetting Concentrate**.

Rewetting Concentrate 2600 is free of formaldehyde and formaldehyde depot substances.

Application:

Dilution with water 1 : 30 to 1 : 50

Packing:

Carton with 12 bottles of 1 kg

Cans of 10 kg and 25 kg

Drums of 220 kg

Containers of 600 kg

The specifications given in this brochure are based on laboratory tests and practical experience. all specifications are to the best of our knowledge and reflect the latest state of the art, however, this does not imply any liability.
